# Who We Are

Tau Meridian Partners (Pty) Ltd is an African-led engineering, infrastructure and energy business registered in South Africa. Established in 2021, we design, supply, install and maintain electrical, energy and industrial infrastructure for clients operating in demanding environments.

**2021**

ESTABLISHED

**Level 2**

B-BBEE CONTRIBUTOR

**5**

AFRICAN MARKETS,  
GROUP-WIDE

Our capabilities span engineering and installations, renewable energy, mining supply, construction, maintenance and procurement of specialised equipment. Clients engage us because a single partner can tailor make a solution, procure the equipment, execute the installation and ensure ongoing operational reliability. Removing the fragmentation and accountability gaps that arise when responsibility is transferred between multiple suppliers.

We deliver across South Africa and into Namibia. We also form part of a wider group of independently registered African companies, giving clients cross-border reach without losing local accountability.

What defines us is not scale. It is that we work where delivery is hardest: remote mine sites, working farms, live industrial plants and infrastructure that cannot afford downtime. That shapes how we specify, how we price and how we respond.

# Vision, Mission and Values

## Vision

To be the partner of choice for African industry, trusted to deliver infrastructure that works in the places where it is hardest to deliver, and in doing so to create possibilities in Africa.

## Mission

We design, supply, install and maintain electrical, energy and industrial infrastructure for mining, agricultural, commercial and industrial clients. We work to international standards with local accountability, and we measure ourselves on whether our clients keep operating, not on whether an installation was completed.

## Values

### **Accountability**

We own the outcome, not just the scope of work. If something fails, we are the ones who come back to it.

### **Technical integrity**

We specify what the site requires, tested against SANS, IEC and equivalent standards, rather than what is easiest to supply.

### **Safety without exception**

Our people work underground on live infrastructure and at height. No commercial pressure justifies a shortcut.

### **Local capability**

We build African teams and African supply chains, because sustained delivery depends on people who are present when the client needs them.

### **Transparency**

Clear scope, clear pricing and clear reporting. A client should never have to guess where a project stands.

# What We Do

Our capability spans the full life of an asset, from specification and supply through installation, commissioning and long-term maintenance.

## Electrical Infrastructure & Installation

Low and medium voltage distribution, transformers, switchgear, distribution boards and cabling for surface and underground applications.

- Custom panel building to specific electrical requirements
- Switchgear control integration for efficient and reliable power management
- Installation of cables, both surface and underground, and cable repair
- High-voltage transmission infrastructure
- Fault finding, rewiring and panel upgrades for uninterrupted power
- Installation support and commissioning

## Renewable Energy and Solar

End-to-end solar photovoltaic capability for grid-tied, hybrid and off-grid installations.

- System design, supply and installation
- Hybrid and off-grid systems with battery energy storage
- Inverters, solar pumping and solar-powered lighting
- Panel cleaning and ongoing system maintenance

# What We Do

## Maintenance, Facilities & Technical Support

Proactive and reactive maintenance designed around uptime rather than callout volume, for industrial plant and property alike.

- Routine site maintenance on weekly and monthly schedules
- Servicing of pumps, motors, compressors and conveyors
- Fault diagnosis and emergency standby support to minimise downtime
- Property maintenance and insurance-aligned repairs for commercial, residential and sectional-title properties
- Certificates of Compliance and preventative maintenance contracts
- Tools and equipment management, including regular inspection and upkeep

## Mining Supply and Site Support

Supply and engineering support for open-pit and underground operations across Southern Africa.

- Mining consumables, drilling tools, jumpers and chisels
- PPE and safety equipment for surface and underground work
- Electrical equipment, switchgear, transformers and motors
- Pumps, hydraulic equipment and conveyor systems
- Procurement for mines, plant maintenance and engineering support

# What We Do

## Construction and Civil Works

Building, renovation and civil capability delivered through the group, from general construction to specialist trades.

- General construction, building renovations and civil works
- Steel fabrication, plumbing and electrical work
- Roofing, including sheeting and repairs
- Air conditioning, geysers and electric fencing
- Construction of substations and related infrastructure

## NuTech Eco Homes

A sustainable residential building system using ecological compressed earth bricks produced on our own presses, finished in high-density fibre cement ship-lap cladding. We handle design, construction and installation on site, and quote to specification and site conditions.

- Turnkey and shell-only builds
- Compact single-bedroom units through to family layouts
- Solar-ready roofing and rainwater harvesting
- Extended verandas and HVAC options
- Available in South Africa, Namibia and Angola

# What We Do

## Farm and Agricultural Consulting

Practical agricultural support for working farms, where a failure during a critical window cannot be recovered.

- Farm and agricultural consulting
- Irrigation and water supply, including borehole and solar pumping
- Farm electrical reticulation and equipment servicing

## Specialist Supply

We supply across nine product categories: electrical, mining, farming and agricultural, solar and energy, tools and equipment, safety and PPE, medical and first aid, IT products and industrial and mechanical items. Full specifications are set out in our Product Catalogue, available on request.

## Compliance, Audits and Consulting

- Detailed technical audits and compliance reporting against regulatory standards
- Insurance-aligned assessment and repair for commercial, residential and sectional-title properties
- Risk assessment and site inspection ahead of scope definition

# Our Footprint

Tau Meridian Partners (Pty) Ltd is registered in South Africa and delivers projects nationally. In Namibia we operate through Tau Meridian Partners Namibia, which has its own locally constituted board and executive team.

We form part of a wider group of independently registered companies. Each is registered and governed in its own jurisdiction, with its own directors and its own compliance obligations. The group is African-led, with international reach through Tau Energies in the United Kingdom. Where a project calls for cross-border delivery, we coordinate across the group.

# Sectors We Serve

Every sector we work in has a different failure cost. That shapes how we specify and how we respond.

## Mining

Strict health and safety regulation, heavy machinery, hazardous and dusty conditions, and critical equipment that must run continuously. Our teams have hands-on experience working on and around mine sites, both surface and underground.

---

## Agriculture

Irrigation and water supply, borehole and solar pumping, farm electrical reticulation and equipment servicing, on operations where a failure during a critical window cannot be recovered.

---

## Commercial and Industrial Property

Maintenance and repair for commercial, residential and sectional-title properties, including insurance-aligned work, alongside distribution board upgrades and solar installations.

---

## Utilities and Infrastructure

Transformers, substations, high-voltage transmission infrastructure and rural electrification.

---

## Manufacturing and Processing

Motor and drive maintenance, conveyor systems, control panels and plant electrical work where unplanned downtime carries direct production cost.

# Leadership

Tau Meridian Partners (Pty) Ltd

The Tau group was founded by five directors, who serve across its companies. Three of the five are the founding directors of Tau Meridian Partners (Pty) Ltd itself; each group company is governed by its own board drawn from and beyond this founding team.

## Jabulani Garry Ngoma

*Chief Executive Officer*

Mr Ngoma brings over 25 years in financial consulting and public sector finance, including twelve years as a Senior Consultant at Deloitte Consulting and nine years with Akhile Management and Consulting, where he was named Employee of the Year in 2018. His expertise spans VAT recovery, financial statements, asset verification and mSCOA implementation across South African municipalities.

---

## Jan Hendrik Dirk Janse van Rensburg

*Chief Operational Officer*

Mr Janse van Rensburg has 12 years of experience in operations and business management, built running commercial agricultural enterprises in Zambia, the United States and South Africa. Managing operations across three regulatory and supply environments shaped the operational discipline he applies across the group.

---

## Henry Janse van Rensburg

*Chief Financial Officer*

Mr Janse van Rensburg has 8 years of experience in business management and commercial operations, gained running agricultural enterprises in the United States and South Africa. He is responsible for financial management, reporting and commercial governance.

# Leadership

Founding Directors, Tau Group

The Tau group was founded by five directors, who serve across its companies. Each company is governed by its own board drawn from and beyond this founding team.

## Jonathan Bryan Waterworth

*Group Operational Director*

Mr Waterworth brings 15 years of experience in security and project management, alongside 12 years in business management. He holds a BA in Criminology and a Diploma in Forensic Accounting, and is registered with the Private Security Industry Regulatory Authority (PSIRA). He serves as Operational Director across the group companies and as Chief Executive Officer of Tau Energies Ltd in the United Kingdom.

---

## John Chikopa

*Director, Malawi*

Mr Chikopa is a network engineer with deep expertise across complex Local Area Network and Wide Area Network infrastructures. He founded Yosa Limited in 2009 and has grown it over more than 17 years into a premier supplier and technology solutions provider in Malawi. As managing executive, he leads a team delivering enterprise ICT infrastructure, biometric security systems and technical procurement to major corporate institutions and government departments nationwide.

# Empowerment and Compliance

**Level 2**

B-BBEE CONTRIBUTOR

**51%**

BLACK OWNERSHIP

**125%**

PROCUREMENT RECOGNITION

Tau Meridian Partners (Pty) Ltd is a Level 2 B-BBEE contributor with 51% black ownership. Qualifying clients receive 125% procurement recognition on spend with us. This status is held as an Exempted Micro Enterprise by affidavit and is valid until 4 January 2027.

This B-BBEE status applies to Tau Meridian Partners (Pty) Ltd as a South African registered entity. Other companies within the wider Tau group are separately registered in their own jurisdictions and do not hold South African B-BBEE status. We do not represent group-wide empowerment credentials based on this certificate.

A copy of the affidavit is available on request.

# Quality, Safety and Standards

## Technical Standards

---

Equipment is specified and installed against recognised standards, including SANS, IEC and British Standards where applicable. Cable, switchgear and transformer specifications reference the relevant standard directly, so that a specifying engineer can verify compliance rather than take it on assurance.

## Quality

---

We adhere to industry standards and employ only proven materials, methods and technologies. Every project, regardless of size, is executed with attention to detail. Where a lower-cost substitution would compromise service life or safety, we say so rather than quote to win.

## Health and Safety

---

Our teams work in environments governed by strict health and safety regulations, particularly on mining sites. We plan around continuous operations, whilst maintaining safe working practices on live infrastructure, and treat compliance reporting as part of the deliverable rather than an administrative afterthought.

## Zero Downtime Commitment

---

For clients running continuous operations, we prioritise safety, efficiency and proactive planning supported by emergency standby response to minimise disruption when something does fail.

# Why Clients Choose Tau Meridian

## Trusted Industrial Expertise

---

With hands-on experience across mining, agriculture, commercial property and manufacturing, we bring practical and technical skills to every project. Our teams understand the specific demands of industrial environments, which allows us to deliver solutions that are efficient, compliant and sustainable.

## Tailored Rather Than Standard

---

A farm operates differently from a factory, and a mine has different requirements from a workshop. We do not offer one-size-fits-all services. We engage with each client, inspect the environment, evaluate risk and then define scope, rather than applying a template.

## Single Point of Responsibility

---

Because we specify, supply, install and maintain, there is no gap between the supplier who sold the equipment and the contractor who has to make it work. That matters most when something goes wrong.

## Competitive Pricing Without Compromise

---

We develop cost-effective strategies suited to each client budget, without compromising on safety, efficiency or results.

## A Client-Focused Approach

Our reputation rests on responsiveness, reliability and respect. We take the time to understand your business, objectives and constraints before recommending anything. Whether you operate a farm, factory, mine or estate, we design maintenance and supply packages that are flexible, practical, affordable and reliable.

Tau is Setswana for lion. Tau is also “ $\tau$ ”, the engineer's symbol for shear stress.

A meridian is the reference line every navigator measures position from & the point where the sun sits highest.

*Strength that holds under load.  
A fixed line to measure by.*

**Six industries | 1 standard**
